SUMMARY

Full-Stack Software Engineer with strong foundations in Data Structures, Algorithms, OOP, and RESTful API development. Experienced in building, testing, debugging, and deploying scalable web applications using modern JavaScript technologies, with hands-on exposure to Agile software development practices.

EXPERIENCE

Data Science & Software Engineering Trainee Jun 2025 – Jul 2025
DUCAT & Codtech IT Solutions *Ludhiana, India*

- Cleaned and preprocessed unstructured datasets using Python, Pandas, and NumPy pipelines to prepare data for model development and optimization.
- Co-developed a CNN-based Skin Lesion Detection model and evaluated model performance using accuracy-based metrics.
- Conducted performance analysis of backend API endpoints, implementing targeted structural fixes to optimize data flow and reduce thread-blocking issues by 15%.

MERN Stack Developer Intern May 2026 – Jul 2026
Codtech IT Solutions Pvt. Ltd. *Remote, India*

- Completed software engineering activities including coding, testing, validation, and deployment within an Agile development environment.
- Analyzed backend API performance and implemented targeted fixes to improve application scalability and reliability.
- Created and maintained technical documentation, design specifications, and test results to support software quality standards.

PROJECTS

AI-Powered Job Portal & ATS System (Talent Bridge) | ***React.js, Node.js, Express.js, MongoDB, Gemini AI*** GitHub Link

- Integrated Google Gemini AI and Mammoth to parse resumes and generate automated resume-to-job matching metrics.
- Engineered 40+ modular REST APIs with JWT-based role authentication to enforce access control and maintain data consistency.

EcoLocal Marketplace | ***React.js, Node.js, MongoDB Atlas, Google Vision API*** GitHub

- Integrated Google Vision API to support image-based product identification and matching functionality.
- Implemented secure authentication using Google OAuth and bcrypt password hashing to strengthen application security.

Expense Tracker | ***Next.js, Prisma ORM, PostgreSQL, Clerk*** GitHub | Live Demo

- Implemented Server-Side Rendering (SSR) to improve initial page loading performance by 30%.
- Designed relational database schemas using Prisma ORM with consistent transaction handling and structured data relationships.

TECHNICAL SKILLS

Languages : C++, JavaScript (ES6), Python (Basic), HTML5, CSS3
Frameworks & Libraries : React.js, Next.js, Node.js, Express.js, Prisma ORM
Databases & Cloud : MongoDB Atlas, PostgreSQL, Vercel, Render
Testing & Tools : Unit Testing, Git, GitHub, Postman, GDB Debugging, Docker
Core CS & Methodologies : Data Structures, Algorithms, OOP, SDLC, Agile, Scrum, Operating Systems, DBMS
Competencies : Software Functionality Validation, RESTful APIs, System Integration Fundamentals

Education

PCTE Institute of Engineering and Technology — Ludhiana, Punjab
Bachelor of Technology in Computer Science Engineering (CGPA: 8.3/10) — *Expected May 2027*

Punjab School Education Board (Class XII) — Ludhiana, Punjab
Senior Secondary Education (88%) — *May 2023*

Punjab School Education Board (Class X) — Ludhiana, Punjab
Matriculation (90%) — *May 2021*

Achievements & Certifications

- Co-authored and presented a peer-reviewed research paper titled "Optimizing Full-Stack Architectures for Modern Web Ecosystems" at the PCTE-ICMR 2024 International Conference, analyzing scalable software design methods.
- Participated as a member of Team HerTechTitans in the Credx Hiring Challenge 2.0, collaborating to design and develop the Talent Bridge Job Portal under competitive hackathon constraints.
- Demonstrated analytical problem-solving skills by solving Data Structures and Algorithms problems across LeetCode and HackerRank platforms.
- Awarded a Letter of Appreciation by university management for strong written and verbal communication while organizing technical events.
- **Certification:** MERN Stack Web Development Professional Internship – Codtech IT Solutions (2026).
